

The Numbers Lady Author Presentation for Children at the Library of Congress

Local children's author and statistician Dr. Rebecca Klemm, a.k.a. The Numbers Lady, will lead children on interactive numerical explorations with the help of fun and friendly number characters at the Library of Congress Young Readers Center. She will read from her books *Hello Numbers* and *NumbersAlive! Books for Young Travelers: Washington, D.C.* Join her for fun adventures that demystify math for young children!

About The Numbers Lady: Since receiving her Ph.D. in Statistics, Dr. Klemm, The Numbers Lady, has specialized in explaining mathematical concepts via every-day language. Dr. Klemm has taught students from grades 7 through graduate school, as well as judges and juries via storytelling. While on the faculty of Georgetown University School of Business she received the 1982 Decision Sciences Instructional Award from the American Institute of Decision Sciences. For the past 20 years she has run her own research firm, Klemm Analysis Group, specializing in data collection and analysis.

About NumbersAlive!: NumbersAlive! is a life-long learning program that encourages excitement about mathematics as a universal language found within all subjects and applicable to everyday life. NumbersAlive! delivers a holistic approach to mathematics through colorful plush number characters, multilayered books, as well as educational games and videos. Through these innovative products, NumbersAlive! makes numbers fun and accessible by imbuing them with personality and characteristics in line with their numeric applications.
