

Be a Holiday Polygon Puzzle Maker!

Let 3 or 6 be your guide to make a holiday polygon puzzle. Number 3 will help you turn a regular triangle into a polygon tree of triangles. Number 6 will help you begin with a regular hexagon and turn it into a 6-pointed star.

Draw a large standard triangle or hexagon. Follow the instructions on the drawing to make a tree of triangles or a star with 6 points. Then decorate your puzzle and surprise your friends with your pieces they can use to put the puzzle together.
