ASSOCIATION

Education and Learning as Drivers for Sustainable Development

**Rebecca Klemm, PhD
NumbersAlive!
Foundation**

Drivers of Sustainable Development

- Societies are challenged by different obstacles and uncertainties
- Societies are generally united in the belief that quality education is necessary to create a sustainable future
- Education and learning play key roles in changing people's mindset

Today's Environment Involves Visual Storytelling

- Students are embracing digital communication on a global scale
- Education and learning can incorporate digital communication
- Professional development is necessary to move educators into the student digital world

How Education and Learning Can Embrace Visual Communication: Think Global; Create Local

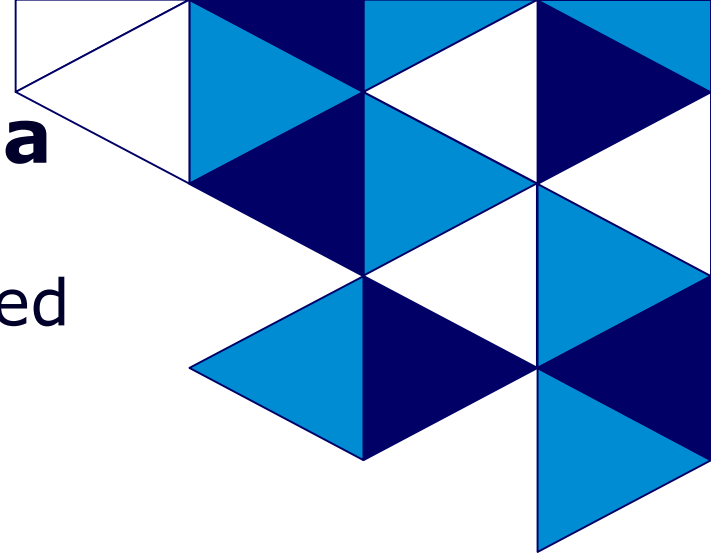

- Students can create their own videos
- Teachers/mentors can lead project-based learning activities and curriculum linking film/video, writing, apps, physical activities, experiences, etc.

A Developing Creative Idea

NumbersAlive! is creating a blended learning approach to numerical literacy

- Engages students of diverse skills
- Teaches life skills along with contextual numerical literacy
- Encompasses STEM/STEAM training
- Creates professional training about math and STEM/STEAM

Join the Conversation

THE GLOBAL TRAVELING NUMBERS SHOW

starring
ZERO and The Digits

Cinco de Mayo episode created with students at Youngblood Intermediate School in Houston, TX.
