

COMPARING ZEBRAS AND CHEETAHS AT THE NATIONAL ZOO

Join The Numbers Lady as she watches and compares zebras and cheetahs: stripes (zebras) versus spots (cheetahs). Both have 4 legs but the designs differ--hoofs (zebra in the horse "family") and paws (cheetahs in the cat "family"). What is the purpose of the spots or stripes? Watch the video to learn more about these fascinating animals.

	ZEBRA	CHEETAH
Diet	What do zebras eat?	What do cheetahs eat?
Coat	What does a zebra's coat look like? What is it useful for?	What does a cheetah's coat look like? What is it useful for?
Habitat	Where do zebras live?	Where do cheetahs live?
Appearance	How many eyes/legs/ears/tails do zebras have? Do they all look the same? What are their "feet" called?	How many eyes/legs/ears/tails do cheetahs have? Do they all look the same? What are their "feet" called?
Family	What family do zebras belong to?	What family do cheetahs belong to?
Fun Facts	How many types (species) of zebras are there?	What are cheetahs number 1 in the world?
